Abstract
In the economic activities of the company cannot be separated from the name of the process of sales and purchases. Especially in the company's accounting system sales process does not escape become part of the system. That's because sales become vital to prosper the company's welfare. As a financial revenue source in the company the sales process must be analyzed and recorded in real time whether wherever and whenever. As an anticipatory action to reduce the crime of financial acts such as manipulation at the company so as not to cause big losses to the company and result in bankruptcy of the company. Use of Web Based Accounting Online System or commonly known WBAOS it can all be done easily. Starting from analyzing company sales to record sales. This is considered very effective if using an accounting system that is still offline and more efficient of course.

Keywords: WBAOS, Sales, and Analysis

1. Introduction
Economic activity in a company cannot be separated from the activities of the sales and purchase transactions [1]. A stable sales process and a stable purchasing process will make a company's financial condition stable too. With the two processes can prosper and prosper a company, Sales activity is one of the main goals of the company [2]. Increased activity sales process can also increase the company's cash, thus covering the capital used [3]. In the accounting system sales process also did not escape the attention. This is because every sales process is recorded and remembered in the company’s accounting system [4]. Because so many employees can manipulate, then no wonder the sales process of the company for personal gain [5]. Also by noting the sales process can monitor and analyze the sales that runs on a company.

A good accounting system can record and analyze the sales process in real time, anywhere and anytime there is internet connection is the most important [6]. This is based on not every time an employee or a company's accountant is in the room, sometimes he joined a meeting by the director to leave the room he occupied. Centralized data as well as ease of access into the most important points within an organization [7]. But by using Web Based Accounting Online System accounting process can take place more efficiently and accurate in delivering information [8]. In terms of the effective benefits we can more quickly find information, because it can be accessed wherever and whenever the accountant is located [9]. For example, when in the meeting room with several clients and directors requested the latest financial records at that instant also the accountant can update it also in accordance with the data that entered in that second as well. purposes and needs always wants to rapid and accurate and make the director happy to get clients [10-12]. Sales processes that can be analyzed and recorded with WBAOS effectively and efficiently.
The Sales Menu serves to record every sale transaction of goods or services in the form of invoice, delivery (E), ordering (E), and offer (E).

To access this menu, click Sales on the vertical menu on the left. You will see the sales page as follows.

2. Results and Discussion

The process of analyzing and recording company sales can be easily done using WBAOS. This is because the system that is online so that can be accessed anywhere and anytime with a good internet connection [13], here are some features that can be used to analyze and record sales:

- **Transaction Status**

Each invoice / shipment / order / offer has their respective status ie, Not Paid, Maturity, Full or Partial Paid. You can sort by that status with the following 3 criteria:

a. **Unpaid Sales (in IDR)**: nominal click to sort transactions with the condition of the transaction has not been paid at all or has been partially paid and is due but partially payable for all periods;
b. **Maturity Sale (in IDR):** sales that are already due either have been paid in part or have not been paid for all time periods. Click on sales numbers below this status and you will see a list of overdue sales;

![Figure 3. Sales Status Display Maturity Date](image)

**Repayment Received Last 30 Days (in IDR):** paid sales, partially or fully paid from the last 30 days to today's date (Today's Date). Click on a sales number below this status and you'll see a list of payments received in the last 30 days;

![Figure 4. Last 30 Days Sales Views](image)

a. You will be taken to the sales list report page.
● Creating Sales Charges
To create sales invoices, click Sales on the vertical menu on the left. Then, click "+ Create New Sales". On the sales added page, you can specify whether you will make a Sales, Booking or Offer invoice.
